**STATIONARY POWER SYSTEMS**  
SPSYSTEMS.NET

## INFINITY POWER SOLUTION

*Railroad Track Side Signaling*

### Key Benefits

- + 48 vdc, 56-600 ampere rectifier and distribution
- + Hot plug technology
- + Power management function
- + Modular system and scalable design
- + Automatic battery test and equalization function
- + Regulated, adjustable output voltages
- + Dual output ranges from 12-14 volts
- + Fiamm Sodium Nickel Technology
- + Consistent performance at -20° to +60°C / -4° to 140°F
- + >4000 cycles at 80% DoD
- + 100% maintenance free in operation
- + 100% caustic material free
- + 100% recyclable
- + No outgassing and zero ambient emission
- + Overall Dimensions: Height 7' 6", Length 23" Width 24"

100% Recyclable
